

# **WILDLIFE WEB APPLICATION**

# scenario of the Project

- This is made for Yala National park.
- This is used to facilitate the work of the officers of the wildlife department working there.
- Only main admins are allowed to log into the user section.
- The main admin also prepares the new accounts that the working officers need to use the web application.
- After providing the correct password and email to the admin ,the admin has been given the ability to log into the dashboard.
- The admin has been given the access to add ,delete ,update, new officers details through the admin dashboard.
- The admin has also been given the ability to look after the information of all the officers working in the wildlife office when necessary.
- All the wildlife officers working in the wildlife office have been given the ability to enter the administrative section by providing the correct username and password.

-

- All the animals in Yala park are grouped in the administrative dashboard.
